### DETAILED ACTION

Claims 1-41 are pending.

#### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-16, drawn to methods for preparing a peptide-spacer-lipid conjugate, classified in class 530, subclass 334.
  - II. Claims 17-24 and 27-41, drawn to a peptide-lipid-spacer conjugate, classified in class 514, subclass 2.
  - III. Claims 25-26, drawn to a targeted therapeutic liposome, classified in class 424, subclass 450.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by another and materially different process, i.e. incorporating the end-group functionalized PEG-lipid conjugates into liposomes and then conjugating with peptide ligands or direct incorporation of the peptide-PD lipid conjugates into liposomal membranes, as set forth in the Specification at pages 3-5.

Inventions I and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be

Art Unit: 1654

made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by another and materially different process, i.e. incorporating the end-group functionalized PEG-lipid conjugates into liposomes and then conjugating with peptide ligands or direct incorporation of the peptide-PEG lipid conjugates into liposomal membranes, as set forth in the Specification at pages 3-5.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, are materially distinct and different products, i.e. the liposome comprises other components, which materially affect the fundamental characteristics of the invention.

Because these inventions are distinct for the reasons given above, the search required is not required for each Group, the inventions have acquired a separate status in the art because of their recognized divergent subject matter and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Claims 17-24 and 27-41 are generic to a plurality of disclosed patentably distinct species comprising peptide-spacer-lipid conjugates. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species and enumerate *all* of the components of the *one* specific conjugate as claimed (i.e. specifically claims 20-23) even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 1654

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
